1. Achievements and Issues

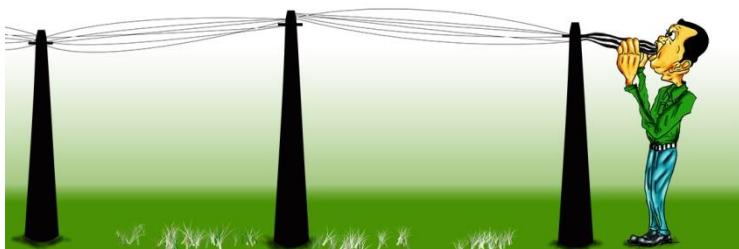

1. Training in schools

Pic shows the training session in Kamonyi district , Southern province

We held training on anti-corruption in one school in Southern province. The training content is to teach integrity by identifying the different types of local corruption, aspects of corruptions and bad manners in schools. The aim is to warn pupils in order to grow up with the spirit of integrity.

RIG approved the methodology of participative learning. Brochures on which is drawn cartoon are used. Students are asked to interpret what are seeing.

Cartoon used in trainings

On other side a paper has been prepared. This is used as guidance to the trainer in order to be inspired of lesson behind the cartoon. This methodology is very useful because it leads students to discover themselves the lessons. Further they contribute to the interpretation of images by bringing news ideas. At the end the trainer gives the summary of the session during which he gave the keys messages prepared RIG .

2.Service Delivery in cells

We are organising survey on service delivery in cells level. This is lower administrative entity in Rwanda.

The survey will be implemented in one sector of district Nyarugenge in City of Kigali.

We are still in negotiations with local authorities to see how this activity could be implemented.

2. Monitoring of presidential elections

On 4th August Rwanda will hold presidential elections. The process is going on today. RIG members will be among the observers in upcoming elections. The activity will be carried out during campaign period as well as on election date.
