## **1.RWANDA INITIATIVE FOR GOVERNANCE HOLDS TRAININGS IN SCHOOLS**

Rwanda remains the least corrupt country in the East African Community according the report of *Transparency* International published in 2015.

Even if the rate of corruption is down in Rwanda, it's not eradicated yet. In this context Rwanda Initiative for Governance (RIG) has program of training on integrity in secondary schools. The integrity is the only efficient army to combat the corruption.

The eradication of corruption is not an event; its long journey and required patience. The education is one of the tools to the mindset change. Youth of Rwanda is the target. They need education in order to grow up with values that will allow becoming responsible in management of the society.

In this perspective, RIG holds trainings secondary schools. The purpose is to provide skills to youth in order to enable to grow with the spirit of integrity and related values.

The activity is carried out in Kamonyi district, southern Province and Nyarugenge District , City of Kigali.

Until now 16 secondary schools were visited in this regards.

Students are motivated because the training focus on matters related to the courses learnt and education as whole.

They wish the program could be extended to the parents because they are also involved in abuse of the society, consequently they serve bad example to the youth.
